

Stunning Homozygous Bay Colt

\$ 5,500

Description

Bizzy is a stunning well bred bay colt that's a Breeders dream!! He's homozygous "E" Allele gene so no matter what you breed him to his offsprings will always have the dark points like Bays and Buckskins just depends on what color mares he's bred to on the colors you'll get! He has excellent confirmation, beautiful head with little ears! He has excellent breeding with plenty of show horses in his pedigree! He's already gaiting in the field and showing signs he might have a beautiful flashy front end! Bizzy is also super sweet, catches on to training quick and loves to be with you! His owner/breeders have imprinted their foals at birth and continued their education as you can see in his video! Bizzy stands to have his feet trimmed, stands tied and leads great! He's up to date on his vaccines, worming, feet, coggins and health cert. Watch his video to see what a smart boy he is!! Located in Cleveland,TN
