

Rare 100% Homozygous Grulla Colt

\$ 8,500

Description

Moon is a gorgeous Grulla colt that was born 4/20/22 and extremely rare! His owners just got back his genetic color test results from the University of KY and he's Homozygous for the Dun Allele AT TBX3 and will pass the Dun Allele gene 100% of the time!! This means if he's bred to a Bay mare you'll have a Buckskin, chocolate you'll have a silver Grulla etc.... Moon will also pass the Dun stripes!! Moon's results are below so you can see for yourself how rare this is especially for the Rocky Mountain breed! He may be the only one registered with RM like this! His owners have been very hands on with him including their Grandkids that can lead them around and groom him and his two Grulla sisters! If you're a breeder and want a nice imprinted colt to train and make your future breeding stallion here you go! His Sire HMH Shoot N To The Moon is one amazing stallion also! His owner not only uses him for trail riding, showing & breeding but uses Shooter as a Therapy horse that goes to nursing homes!! Pictures below of him. Moon will not last long, watch his video to see how well his conformation is! His owners also have two Grulla fillies available out of the same stallion! Moon is located in Tridell, Utah
